

European ports, such as Antwerp and Zeebrugge in Belgium, are filled with unsold electric vehicles from China due to slow sales and logistical issues. Despite incentives, nearly 1.7 million cars arrived at Antwerp-Bruges ...

The manufacturing of electric vehicles is becoming a cleaner production process overall as well, and allowing the auto industry to continue its progress with electric vehicle production without ...

To address these challenges, one promising solution is the integration of vehicle-to-grid (V2G) technology. By allowing EV batteries to act as distributed energy storage assets, V2G can help balance the grid, improve efficiency, and reduce ...

Press release New £63 million boost for Britain's electric vehicle revolution Funding will help to build a fairer, cleaner future where every family can benefit from cheaper, greener transport.

Energy tariffs for EVs are a bit more complicated than your standard gas and electricity deal, so before we go through the tariffs, here are some tips to help you navigate the market... The cost to charge your EV at home depends ...

Here are four tangible benefits for electric cars, charging stations and energy grids. 1. Supporting Fast Charging. Level 1 EV chargers may need 40-50 hours to charge a battery-electric vehicle, ...

Electric vehicles (EVs) are more popular than ever in the UK, making up a fifth of all new cars registered in 2024 according to the Society of Motor Manufacturers and Traders (SMMT). But that doesn't mean they're right ...

Zenobe Energy Funding: \$2.9B Zenobe Energy is the largest independent owner and operator of battery storage in the UK. It buys and manages grid-scale batteries for its commercial customers, such as utilities ...

Recent research published in "Carbon Neutrality" sheds light on the promising role of Thermal Energy Storage (TES) systems in the quest for carbon neutrality, particularly in the ...

The fleet electrification forum event brings transport and energy professionals together to help accelerate the decarbonisation of fleets across both the public and private sectors. This event focuses on best practice fleet ...

Save hundreds of pounds a year with your own electric vehicle charger We rated the 12 best home EV chargers against 10 key criteria Criteria include warranty, value for money and customer feedback Read our

guide ...

The UK Government has announced a £650 million electric vehicle (EV) grant scheme, worth up to £3,750 per car at the point of sale, for new eligible EVs priced at or under £37,000.

Levistor has developed a unique, low-cost flywheel energy storage system that they are using to boost the grid for ultra-rapid EV charging (350kW). Field is a renewable energy company aiming to accelerate the build-out of ...

Country: USA | Funding: \$85.2M Ion Storage Systems is focused on developing the most energy dense, safest batteries that can be deployed in any environment. Breakthroughs in solid state battery technology have led to ...

Electric vehicles (EVs) have emerged as a pivotal technology for environmental protection, driving the development of battery energy storage systems (BESS) for sustainable charging solutions ...

Canada's energy storage market is on the brink of substantial expansion, driven by increasing demand for electricity from electric vehicles, hydrogen production, and industrial use. This growth is further supported by ...

Impact of Government Policies and Regulations Government action is a powerful driver of the UK automotive industry trends, especially in promoting electric cars UK. The UK government EV ...
