

What Are High Power Batteries and How Do They Work? High power batteries are energy storage devices designed to deliver high currents quickly. They are commonly used in applications requiring rapid bursts of energy, such as ...

Understanding Electric Car Lithium Batteries Lithium batteries for electric cars are advanced energy storage solutions that utilize lithium-ion chemistry, providing lightweight, high-capacity ...

The porous silicon-based anode material market is experiencing robust growth, driven by the increasing demand for high-energy-density batteries in electric vehicles (EVs), portable ...

Recent research published in "Carbon Neutrality" sheds light on the promising role of Thermal Energy Storage (TES) systems in the quest for carbon neutrality, particularly in the ...

Converting electric cars to batteries helps stabilize the power grid. The technology allows idle vehicles to be used to store and release energy. Pilot projects in Europe are exploring these ...

Zagreb's public transport operator, ZET, has launched the consultative phase of a tender to acquire 70 electric buses, marking a major step towards the city's goal of transitioning its fleet ...

The sulfide-based solid electrolyte market is experiencing significant growth, driven by the increasing demand for safer and higher-performing batteries in electric vehicles (EVs) and ...

General Motors (GM) is supplying both used and new electric vehicle batteries to Redwood Materials, which is converting them into stationary energy storage systems, the companies ...

Electric vehicles (EVs) have emerged as a pivotal technology for environmental protection, driving the development of battery energy storage systems (BESS) for sustainable charging solutions ...

The Trojan T-105 Plus 6V Flooded Battery is a deep-cycle lead-acid battery designed primarily for electric vehicles requiring sustained power delivery, including golf carts, low-speed industrial ...

US President Donald Trump has declared his disdain for electric vehicles (EVs) and with sales disappointing, carmakers who invested heavily in battery production could follow General ...

Press Release, 23 July 2025 Southwest Research Institute (SwRI) has successfully completed its ambitious eight-year-long connected and automated (CAV) vehicle technology project. As part ...
