

The 2025 heatwave that scorched Europe from June to July was more than a climatic anomaly--it was a stress test for the continent's energy infrastructure. Temperatures exceeding 40°C ...

The European Industrial Strategy to retain the EU as global centre for automotive & energy storage innovation and competitiveness; bolster Europe's resilience and strategic autonomy in critical industrial sectors and support the ...

This strategy outlines the role of storage batteries in the national electricity system, identifies the challenges to be addressed and proposes 20 concrete measures to facilitate the deployment ...

"The project brings energy storage to the islands, so the new renewable energy installed by the private sector is not wasted," said Sergio Ugarte at the Ministry of Climate Change, ...

The growing frequency and severity of extreme events, both natural and human-induced, have heightened concerns about the resilience of power systems. Enhancing the resilience of power ...

Centralized grids, vulnerable to missile strikes, are being replaced by distributed generation units (5-100 MW) that combine solar, wind, battery storage, and gas. This decentralized model not ...

India's renewable energy capacity has surged to 179 GW, but integrating that power into the grid is the next frontier. India's \$70 billion Investment Plan under our Renewable Energy ...

Distributed Energy Storage Systems Revolutionizing Local Power Resilience Al redefinir la resiliencia energética a nivel comunitario, los sistemas de almacenamiento de energía ...

A Formal Delay, But Urgency Remains On July 18, 2025, the Council of the European Union adopted a regulation delaying the due diligence obligations under Regulation (EU) 2023/1542 to August 18, 2027. The change ...

Redéfinissant la résiliencia énergétique à l'échelle des collectivités, les systèmes de stockage d'énergie distribués (SED) représentent une transition fondamentale, passant d'une ...

CITY Furniture's 4th Annual Green Summit Brings Together NASCAR, Local Changemakers, and Clean Energy Champions Bord Gáis Energy reports profit of EUR39m for first half of 2025 Inlyte ...

The European energy transition has long been framed as a triumph of ambition and innovation. Yet, beneath the surface of its renewable energy targets and carbon neutrality goals lies a ...

As the impact of climate change and environmental degradation increases, it is clear that investing in adaptation and resilience - concrete steps such as installing stormwater pump ...

Businesses interested in expanding their solar footprint in Luxembourg should consider: Exploring which tender suits their project type and size. Incorporating battery storage to maximize ...

Electricity costs are one of the biggest challenges for businesses in Luxembourg. Rising energy prices, an unstable energy market, and increasing environmental requirements are pushing ...

Tom Sisto, CEO of US flow battery provider XL Batteries, writes that lithium-ion batteries' dependence on a supply chain controlled almost completely by one country is a risk that could ...

The strategy, announced on 9 July, aims to maximise the added value of storage batteries for end consumers and the electricity system as a whole, by enhancing its flexibility, resilience, and ...

Elestor's hydrogen-iron flow batteries offer scalable, safe energy storage to boost Europe's grid resilience and autonomy. As Europe intensifies efforts to decarbonise its energy systems, the ...

Energy storage for resilience luxembourg city
