Does the ADB support Papua New Guinea's energy sector?

The ADB has been a longstanding supporter of investment in PNG's energy sector. Christian Lohberger, President of the Solar Association of PNG, updates Business Advantage PNG on all matters solar and why the future of Papua New Guinea's renewables sector looks bright.

How much electricity does PNG have?

According to the World Bank as of 2022, about 19% of PNG's population has access to electricity, but grid penetration in provincial capitals is less than 14%. PNG's per capita consumption ratio of electricity is also one of the lowest in the world.

How is PNG Power regulated?

PNG Power was established under the Electricity Commission (Privatisation) Act of 2002. It is regulated under the Electricity (Amendment) Act. PNG Power's revenues are insufficient to fund the planned expansion of the country's energy infrastructure.

Will Papua New Guinea get electricity by 2030?

The project to connect 70 per cent of Papua New Guinea's population to electricity by 2030 is making progress, according to senior officials from the United States-funded component, the USAID-PNG Electrification Partnership. Filed Under: Doing Business in Papua New Guinea, Sector profiles

Will Power Auctions help Papua New Guinea?

The vision for reforming Papua New Guinea's power sector is becoming clearer, with power auctions likely to play a major role in driving down electricity prices and helping the country meet its future electricity needs.

Does PNG have a backup generator?

Due to frequent power outages, most larger companies in PNG own their own backup generators in addition to buying electricity from PNG Power. Under PNG's Vision 2050 document, PNG has a stated goal of reaching 100% renewable power by 2050.

Over a gigawatt of bids from battery storage project developers have been successful in the first-ever competitive auctions for low-carbon energy capacity held in Japan. A total 1.67GW of projects won contracts, including 32 battery energy storage system (BESS) totalling 1.1GW and three pumped hydro energy storage (PHES) projects totalling 577MW.

A feature of such an early gas industry was railway trains hauling coal around the country from the coal fields where it was mined to municipal gasworks. Located adjacent to these gasworks there were massive and ugly containers called gasometers to provide for storage of the gas at ambient conditions. ... Papua New Guinea
