

We are at the forefront of research and development, pioneering solutions that bridge the gap between green energy and cutting-edge digital processes. With a shared commitment to a more sustainable future, we ...

This trend is further amplified by the growing adoption of energy storage systems (ESS) for grid stabilization and renewable energy integration. The market is witnessing significant ...

The exploration of phenolphthalein's role in energy dissipative systems is in its early stages, with a growing market potential as energy efficiency becomes increasingly crucial. The technology is still emerging, with varying levels of ...

The global Nickel Hydroxycarbonate market is experiencing robust growth, driven by increasing demand from the electric vehicle (EV) battery sector. Nickel Hydroxycarbonate is a crucial ...

The sulfide-based solid electrolyte market is experiencing significant growth, driven by the increasing demand for safer and higher-performing batteries in electric vehicles (EVs) and ...

The Low-carbon and Smart-energy Innovation Park Solutions market is experiencing robust growth, driven by increasing global awareness of climate change and the urgent need for ...

Copenhagen Energy's 132 MWh Everspring battery energy storage system (BESS) portfolio will source its technology from Huawei Digital Power. This project is scheduled for grid readiness ...

Two projects led by the University of Oxford have received a major funding boost from the Faraday Institution, the UK's flagship institute for electrochemical energy storage research. The funding is part of a £19 million ...

This includes the development of bio-based polymers, adhesives, and coatings that can compete with or surpass the performance of their petroleum-derived counterparts. Additionally, there is a growing focus on utilizing carbonyl ...

The challenge with Renewable Energy sources arises due to their varying nature with time, climate, season or geographic location. Energy Storage Systems (ESS) can be used for storing available energy from Renewable ...

NIB has signed a 9-year loan to co-finance Danish BioCirc Group's carbon dioxide liquefaction and transport investments at its biogas facilities in Denmark. The EUR 27.5 million (DKK 205 ...
