The excess energy produced by solar PVs can be fed into the grid with net energy metering to generate income for the households. The gap addressed in this paper is the adoption of solar PVs into sustainable low-cost housing plans to provide clean energy for homes. In countries such as Uganda and Indonesia, there is limited research on this topic.

With steadfast economic development, the Greater Kampala Metropolitan Area (GKMA) faces increasing pressures to raise low-carbon electricity in the energy consumption by fuel type, abate CO 2 emissions, and also restructure transportation for sustainability. GKMA is Uganda"s capital with rampant anthropogenic interference that causes climate change.
