

Eplus smart energy s a South Africa

Distributed energy resources (DERs), including solar panels, wind turbines, and battery storage, are becoming more prevalent in power grids. This increased penetration necessitates a closer look at how they impact the grid's operation. Power grid operators face challenges in ensuring the secure operation of the network in the presence of DERs. This ...

By Jeannot Boussougouth The South African electricity industry is in a phase of rapid change, driven by the current electricity crisis. This is primarily as a result of underinvestment in power generation projects over the past 10 years. This situation has been exacerbated by underinvestment in transmission and distribution infrastructure. As a result, the ...
