

Last week renewable energy company Seriti Green received a budget quote from Eskom that it had applied for as long ago as February 2021 - that's the delay in obtaining collaboration from ...

Executive Summary Battery Energy Storage Systems (BESS) are rapidly emerging as a foundational technology for South Africa's energy future, critical for stabilizing its beleaguered ...

Standalone BESS systems, unlinked directly to solar or wind farms, flower across the continent only now, often stalled by financing, grid readiness, or regulatory inertia. With its commercial ...

Updated 1st July 2025 - The Red Sands Battery Energy Storage System (BESS), set to be Africa's largest of its kind, has officially reached commercial close. Developed by Globeleq, which is 30% owned by Norfund, in partnership with ...

It will be the largest standalone battery energy storage system in Africa. Red Sands BESS will use approximately 5 hectares (12 acres) and will connect to the grid through the Eskom Garona ...

The project is situated in the Northern Cape and is the largest standalone BESS plant in Africa to reach commercial close. The site will occupy five hectares and involve substantial upgrades to ...

Aging infrastructure, rising Eskom tariffs, and load-shedding have created a storm of operational and financial uncertainty. But within this crisis lies an opportunity: to flip the script through ...

Stakeholders across the energy sector are now developing BESS strategies aimed at unlocking long-term value for them. While security of supply remains important, it is no longer the only ...

Aging infrastructure, rising Eskom tariffs and load-shedding have created a storm of operational and financial uncertainty. But within this crisis lies an opportunity: to flip the script through ...

Discover how Smart Nano-Grids and localized BESS can empower municipalities to regain control over electricity supply, reduce costs, and improve reliability through decentralized energy ...

Construction is set to begin on Africa's largest standalone battery energy storage system (BESS) following financial close on the 153 MW Red Sands project in the Northern Cape. Developed ...

The Red Sands BESS will be on a 5-hectare site in the Northern Cape region of South Africa, connecting to the grid via Eskom's Garona substation. It is hoped the BESS site will enter ...
