

The SAFE range, designed for vehicles of all categories, is the concrete answer to the ever-increasing demand for energy and the need for a high power accumulator for high starting currents, combined with safety and extreme ...

FAAM - Energy Saving Battery | 9.118 follower su LinkedIn. On the path to Energetic Transition | FAAM, controlled by Seri Industrial Spa, is specialized in the production and recycling of lead-acid and lithium batteries for traction, industrial, storage and military applications. Thanks to the fully integrated supply chain, including a Battery Management System, FAAM brings to market ...

Dal 2000 FAAM è attiva nell'applicazione della tecnologia Fuel Cell, sia nel campo dei trasporti che per gli usi stazionari, raggiungendo traguardi importanti nella realizzazione di veicoli ad idrogeno, quali lo Smile Fuel Cell. ... Battery Management System) per applicazioni automotive, trazione e stazionario. Nascita business unit in Cina ...

FAAM is building a Gigafactory in Teverola for the production of cells, modules, and battery packs for Electric Vehicle, Energy Storage, Industrial, and Special applications. ... We are looking for a Battery Designer with ...

It represents the real answer to the increasing demand of energy and to the need of a highly powerful battery for high starting currents ensuring safety and extreme reliability at the same time. It was built with lead, calcium and tin alloys with a special recombination cover, centralized degassing and flame-retardant pads.

As part of Seri Industrial group, FAAM is proud to contribute to the project with Eni for the development of the lithium-iron-phosphate (LFP) battery chain. Thanks to this agreement, the new Brindisi plant will be joined by the one under construction in Caserta by FIB, a subsidiary of Seri Industrial, consolidating the role of FAAM and the ...

Powerful, safe and low maintenance, this type of battery is also equipped with the FAAM S3 - Stop Shock System, with which it passes the homologation tests of the leading automotive OEMs, as well as the tests required by EN standards. As with the GENIUS, thanks to the FAAM S3 system, the plates are blocked on both the upper and lower areas ...

FAAM is building a Gigafactory in Teverola for the production of cells, modules, and battery packs for Electric Vehicle, Energy Storage, Industrial, and Special applications. ... We are looking for a Battery Designer with experience in the design of lithium-ion battery systems, who want to work with us in Teverola, Caserta, Italy.

Faam battery Sweden

FAAM sta costruendo a Teverola una Gigafactory per la produzione di celle, moduli e pacchi batterie per veicoli elettrici, accumulo di energia, applicazioni industriali e speciali. ... Siamo alla ricerca di un Battery Designer con esperienza nella progettazione di sistemi di batterie al litio, che voglia lavorare con noi a Teverola, Caserta ...

moduli e soluzioni battery system Celle, Moduli e Batterie a litio Made in Italy realizzate con materiali green e sostenibili ed in produzione verticale. Partiamo dal materiale attivo (Litio - Ferro - Fosfato), passando per la realizzazione della cella con un processo water-based, per arrivare al sistema batteria inclusivo del nostro BMS ...

In Norway and Sweden, numerous companies are pursuing ambitious plans. They want to make best use of Scandinavia's favourable conditions: the region's electricity mix, dominated by wind and hydropower, allows for batteries to be manufactured with a small carbon footprint. ... In the town of Teverola, northwest of Naples, FAAM, an Italian ...

Since 2004 FAAM develops customized solutions with quality standards of excellence, made up of lithium batteries complete with our innovative management system (BMS - Battery Management System). With automotive, traction and stationary applications.

The expertise of the Faam brand in the field of battery production, combined with the leadership in the plastics sector, allow the entire group to make the concept of Circular Economy not a goal, but a real business model. The Faam brand owns four plants, three of them on Italian soil, which are:

We have been present in the battery market since 1974 with customised solutions and a complete Circular Economy model. We produce both lead-acid and lithium-ion batteries, with a strong focus on research and development.

Sweden's Northvolt recently announced it had successfully produced its first battery cell. If all goes right, lithium-ion cell production in Europe (EU-27, Great Britain, Norway, and Serbia) will more than double by 2030. ... which is expected to begin production by Italtel, and FAAM Group, too, are developing their own gigafactories ...

The project participants - Automotive Cells Company (ACC), BASF, BMW, Elemental Strategic Metals, Endurance, Enel X, FAAM, Flash Battery, Fortum Recycling & Waste, Keliber, Nanocyl, SEEL, Solvay, Terrafame, Umicore, and ...
