Real People on ShineHub Solar + Battery Systems "At every level the [ShineHub] staff went beyond expectation in their professionalism, blending technical ability, customer care and courtesy in uncommon measures. Accordingly, I recommend ShineHub without reservation." Paul Cockburn, NSW

Claims that solar is crashing the grid are plastered across the press. Solar "experts" pop up on TV to tell you that the government needs a kill switch to control your solar panels. Daytime solar feed in credits are falling every year. And in 2025 solar panel customers may be charged for sending power back to the grid during the day.

Solar for a Cause partnered with ShineHub due to their excellent reputation in the industry, comprehensive solar solutions (panels, batteries, and Virtual Power Plant), competitive pricing, outstanding post-installation customer support, cutting-edge app technology, and their commitment to environmental preservation and protection. ...

A Shift in Strategy: Previously, high FiTs made it profitable for households to sell back their excess solar power at a great profit. But with current low rates (as low as 5c FiTs), it's more beneficial for households to use their own generated power, avoiding high grid energy prices both day and night. Adding a solar battery into the equation is essential to achieve this.

As a result of the 2018 Geelong Community Solar Program, Geelong Sustainability, the Rotary Club of Geelong, and ShineHub donated 4 solar systems to very worthy recipients. Our Community Solar Programs make going solar affordable and accessible to everyone while building the virtual power plants of the future.
