

Energy storage specialist Apatura has gained planning approval for a 700MW battery energy storage system (BESS) in Inverclyde, Scotland. Once completed, the Aunchetiber BESS will be Scotland's largest standalone ...

Clean energy enterprise TagEnergy has reached financial close on its 49.9MW/99.8MWh Pitkevy facility in Fife, Scotland. Pitkevy is TagEnergy's first split-contract project, with Tesla providing the Megapack 2 XL battery systems and RJ McLeod completing site works and battery container installation.

Apatura secures planning consent for Scotland's largest standalone Battery Energy Storage System (BESS) in Port Glasgow, with a 700MW capacity. This milestone supports Scotland's renewable energy ...

Other large-scale BESS in the UK include Amp Energy's two 400MW / 800MWh assets in Scotland, as well as a 360MW Sembcorp Energy UK BESS. The Uskmouth BESS is expected to become operational towards the end of 2024, with construction expected to take 18 months - however the development is still subject to planning approval.

Renewable energy investor Copenhagen Infrastructure Partners (CIP) has confirmed that its 500MW/1,000MWh battery energy storage system (BESS) in Scotland, UK, is ready to commence construction. The project, which is being developed by network solutions company Alcemi via CIP's Flagship Funds, has been issued a "Notice To Proceed" and ...

This is the largest planning consent for a standalone BESS in Scotland to date and the biggest ever secured by Apatura, marking a significant milestone in the company's relentless mission to deliver sustainable energy solutions that fast-track the path to net zero. It is also the fourth consent for the company in less than 12 months, and ...

The company is developing a 2.5GWh project, called Hunterston, on a site in Peel Ports in North Ayrshire, Scotland. The first step is to build the grid connection and infrastructure for grid stability services, for which ...

Plans for the Pond Energy Park feature a 2-hour BESS located near Bathgate, a town situated between Edinburgh and Glasgow. It is hoped that the proposed BESS will be operational by 2031, should it be approved. The project is expected to have an operational lifespan of 25 years. An image of the site location and boundary can be found below:

The Town and Country Planning (Notification of Applications) (Applications under section 42) (Scotland) Direction 2020. The third matter to make you aware of is a new Direction by Scottish Ministers relating to

Planning applications made under Section 42 of the 1997 Town and Country Planning (Scotland) Act.

Renewable energy storage firm Aputura has secured planning permission to build and operate a 100MW battery energy storage system (BESS) near Dundee in Scotland. Scottish ministers approved the scheme, which will consist of 52 lithium-ion batteries in steel containers directly connected by underground cable to the nearby Tealing substation.

Aerial view of the pair's Black Hillock project, currently in construction. Image: Wartsila. The first energy storage asset built using Wartsila's new Quantum High Energy battery energy storage system (BESS) solution will be a 300MW/600MWh project in Scotland, UK.

The Scottish energy storage developer, ILI Group has announced a sales tender for a 50MW battery energy storage system (BESS) in Scotland. The "Dyce" project has a connection date of September 2025 with the sales tender opening to expressions of interest until 28 April and non-binding offers until 12 May 2023.

Paying operators to switch off wind farms in Scotland cost billpayers £920 million (US\$1.2 billion) in 2023, and BESS developer and operator Field recently did some analysis showing that BESS could help ...

Aputura said of the planned Auchentiber Road BESS: "When it comes online, it will make a substantial contribution to the Scottish Government's goal of generating 50% of Scotland's overall ...

A 200MW battery energy storage system (BESS) in Bathgate, Scotland, has passed through West Lothian Council's executive committee with no objections. Ministers at the Scottish government's Energy Consents Unit will now consider the proposals and decide whether to grant consent.

The BESS project is 100% owned by TagEnergy and received support from technology provider Tesla, optimiser Habitat Energy, and independent renewables company RES Group. In December 2021, TagEnergy secured a 100% stake in the Lakeside project from RES in a deal worth £65 million (US\$85 million), as reported by our sister site Solar Power Portal.

The Roaring Hill Battery Energy System is a 10,932kW energy storage project located in Glenrothes, Fife, Scotland, UK. Free Report Battery energy storage will be the key to energy transition - find out how. The market for battery energy storage is estimated to grow to \$10.84bn in 2026.

Once completed, the Auchentiber BESS will be Scotland's largest standalone BESS, while also marking the largest project Aputura has received approval for across its 10GW pipeline. The BESS will be situated on around 16.39 hectares of land near Port Glasgow, Inverclyde, with permission secured for the construction of 240 BESS units, 140 BESS ...

UK's Kona Energy has obtained approval from the Scottish government for its 228MW Smeaton battery energy storage system (BESS) project. Located near Dalkeith in East Lothian, the project will bolster the UK's

renewable energy capabilities and grid stability.

Two Battery Energy Storage Systems (BESS) have already been approved - with more on the Berwickshire horizon. Some residents fear a 'gold rush' of proposals, further and further away from the ...

The High Nether Faul Farm project, located in Lanarkshire, Scotland, is the largest planned installation of the three, with plans to host 1GW/2GWh of BESS capacity in the form of 312 TeraStor units, with a ...

The company is developing a 2.5GWh project, called Hunterston, on a site in Peel Ports in North Ayrshire, Scotland. The first step is to build the grid connection and infrastructure for grid stability services, for which planning permission has been secured, while the full LAES system buildout still requires planning permission, which the ...

Quantum High Energy technology will first be deployed at Zenobe Energy's 600MWh BESS in Scotland, UK. Image: Quantum High Energy. Technology provider and system integrator Quantum High Energy has been selected to provide its Quantum High Energy storage technology for a 300MWh battery energy storage system (BESS) in South Australia.

YLEM Energy, the Salford-based renewable energy firm, has submitted planning applications for two new battery storage sites in Scotland: one at Dounreay in Caithness and another at Ardencaple Farm in Helensburgh. ...

Bluestone Energy has submitted three 69MW battery energy storage system (BESS) project proposals for Scottish Water sites in Renfrewshire. The proposals, which have been submitted to the Scottish Government, will be situated at Scottish Water's Laighpark Waste Water Treatment Works (WWTW), Stanely Water Treatment Works (WTW) and Linwood ...

Battery energy storage system (BESS) and EV solutions firm Zenobe Energy has started construction on a 300MW/600MWh project in Scotland, after securing project financing. Zenobe Energy will use the £163.147 million (US\$187 million) funding arranged by retail banking company NatWest to build the Kilmarnock South project which is anticipated to ...

Renewable energy storage specialist Apatura has secured planning permission to build and operate a new 100 megawatt (MW) capacity Battery Energy Storage System (BESS) at Tealing near the city of Dundee on ...
