The tilt angle is the angle between solar panels and the ground. Calculating the inclination (or tilt) angle of solar panels is a vital aspect of photovoltaic design. The tilt angle of solar panels must be such that solar panels receive maximum solar energy. It happens when solar panels are angled perpendicular to the incoming sun's rays.

For solar panels in Pakistan, the ideal direction is generally south-facing, which corresponds to an azimuth angle of approximately 180 degrees. Since Pakistan is located in the northern hemisphere, facing the solar panels towards the south maximizes their exposure to sunlight throughout the day. South-facing panels capture the most sunlight ...
