

France low budget solar panel

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is EUR540 per household per year.

How much does a DIY solar panel cost in France?

The average price for a DIY kit including 16 panels is around EUR6,250. These are generally capable of producing 6.4 kWc (watt crête, or 6.4 kWc), which is about 1.5x the power consumption of an average household in France.

How many solar panels are installed in France?

Solar panel installations are increasing in France with the last year seeing over 200,000 installations across the country as prices fell. This includes installations from both professionals and from DIY kits, which allow homeowners to set up the panels by themselves. Read more: [Why record numbers of homeowners in France are installing solar panels](#)

Can you have solar panels on a property in France?

Other rules may apply if your property in France is located in certain historic areas. Read more: [Can you have solar panels on homes in historic areas of France?](#) You will also need to contact Consuel for an Attestation de Conformité to confirm your installation is safe to be connected to the main power grid, which costs EUR180.

How many solar installations are there in France in 2023?

Its figures show that at the end of 2023, there were almost 835,000 installations nationwide, up from 628,000 a year earlier (an increase of a third in 12 months). From 2016 to 2020, solar capacity in France increased by 10%-13% each year. However, in 2021, it shot up by 28% year-on-year, and again by more than 20% in 2022 and 2023.

Can solar panels work in winter in France?

"In winter, for one thing, it's not possible," said Ms Constanza, referring to the fact that the winter in France rarely provides enough sunlight for solar panels to work to any kind of useful capacity. "You could have storage batteries, but they're very expensive, they pollute, and they probably won't even be enough."
