Is France a good country for solar power?

In 2016, France was ranked 4th in the EU by installed capacity and 14th in terms of PV capacity by inhabitant at 107.3 Wp/Inhab compared to the EU average of 197.8 Wp/Inhab for the year. The country's largest completed solar park to date was the 300 MW Cestas Solar Park.

Are French solar installations bolstered by a new law?

Beyond falling prices, the IEA PVPS report said solar installations were bolstered by the measures introduced in the French government's Law for the Acceleration of Renewable Energies which came into force in 2023. A requirement that competitive tender winners share some of the added value with locals.

Do car parks need solar roofs in France?

A requirement that competitive tender winners share some of the added value with locals. Car ports and car parks have become a significant driver of solar adoption in France. In November 2022, the government passed a law requiring all large car parks to have solar roofs from mid-2023.

Does Carrefour have solar?

More recently, French renewable energy firm GreenYellow inked an agreement with retail giant Carrefour to install over 350MW of solar canopies above car parking spaces at Carrefour's locations in France. Residential and commercial solar installations took a greater market share in 2023 than previous years, the IEA said.

A study co-written by industry figures has put forward new claims of the cost-competitiveness of European solar-plus-storage, amid predictions that grid parity will unfold continent-wide by 2025.

The China National Nuclear Corporation (CNNC) has begun the construction of the country's largest offshore solar farm at Haibin harbour in the city of Lianyungang in Jiangsu Province, the Global Times has reported.. With a capacity of 2GW, the photovoltaic (PV) demonstration farm is being built with an investment of 9.88bn yuan (\$1.39bn).

TotalEnergies has started commercial operations of Danish Fields and Cottonwood, two utility-scale solar farms with integrated battery storage in south-east Texas, US. Danish Fields is TotalEnergies' largest solar farm in the US, with a capacity of 720MWp (megawatt peak) and 1.4m ground-mounted photovoltaic (PV) panels.

The Australian government has approved an ambitious plan to build a 12,400-hectare solar farm in the Northern Territory that would transmit energy to Singapore. The US\$19 billion project, developed by Australian company Sun Cable, will see the company transport the electricity via 800km overhead transmission lines to the city of Darwin.

OverviewSolar PV market by segmentHistorySee alsoExternal linksFrance is aiming to increase its solar PV capacity from 11.5 GW in March 2021 to 23 GW by the end of 2023. The country offers feed-in tariffs for small-scale solar PV up to 100 kWp on rooftops for self-consumption, with a specific grid tariff for collective users and exemption from the domestic tax on electricity for projects under 1 MW. However, a proposal to reduce solar PV subsidies for ongoing projects until 2030 has created controversy, affecting the sector's growth ...
