The solar project, currently under construction in southern Peru, will be fully operational by the second half of 2025. This region is recognised as a prime solar resource hub on a global scale. The expansion will not only enhance the output of the Sunny solar plant but also support the construction of two adjacent solar projects through energy ...

Regular maintenance is essential to ensure your generator operates efficiently when you need it most. We recommend scheduling maintenance checks at least once a year for all types of generators, including RV generators, full house generators, and solar home generators.

Solar generators these days use lithium-ion batteries. There are two types: Li-ion NMC and LiFePO4 or lithium iron phosphate. Li-ion NMC batteries are lighter and cheaper. So solar generators using these types of batteries have easier portability. They are great for camping and outdoors. LiFePO4 batteries are heavier but they last much longer.

In a home setup, the DC current is then sent to an inverter, which is converted into AC, the type of electricity used in your home. In a solar generator, energy is stored in the battery cells for ...
