We are building a 2300 SF "pretty good" house in Climate Zone 6 in northern Vermont using all-electric systems (heat pumps and in-wall electric heaters). Considering two alternates for backup power: 1) exterior pad-mounted propane backup generator 2) Tesla (or other) battery power wall units in conditioned basement.

The 1500-watt inverter I purchased on Amazon for \$449 bucks doesn't just convert battery power to AC voltage. It's also a battery charger, and allows the constant throughput of AC power when battery juice is not needed. It's described as a "pure sine wave inverter charger." These are the things I looked for before buying:
Quiet operation

Building a battery backup system may seem intimidating, but with careful planning, it can be a safe and rewarding DIY project. Battery Bank: This is the heart of your system. Your choice will depend on your power needs, but deep cycle batteries are generally a good option for a DIY battery backup system.
