Energy storage allows energy produced during times of excess generation (mainly wind) to be stored and released later when there is a deficit of renewable energy. Pumped Storage Hydro "PSH" is a mature, proven, long-lifespan (100yr+) technology which has the ability to deliver large capacities of energy storage for long durations.

Awarded in May 1997, the MTPS block extends over more than 5,000 square kilometers, with water depths ranging from 1,300 to 3,000 meters. Through its subsidiary Total E& P Congo, Total is the operator with a 40% interest, alongside partners Eni Congo (30%) and Esso Exploration and Production Congo (Mer Tres Profonde Sud) Limited (30%).

It is a Joint Venture between Gilkes Energy and the landowning family. A 2.5km pipe transfers water from the intake to the powerhouse.
