

Several new entrants into the renewable space have already been making a difference. Recent geopolitical threats have exposed vulnerabilities already inherent in our global energy grid, underlining that the world needs our ...

EU Member States have put in place 3,000 policies and measures to prevent the worst impacts of climate change. National climate change mitigation strategies, policies and other accompanying measures are also in ...

The world is currently facing a climate crisis, with greenhouse gases causing global warming and destabilizing the climate. While individual actions can contribute to emissions, it is crucial to ...

Summary (&#214;zet) The major environmental (&#214;zet) problems that threaten our planet include global warming, air and water pollution, deforestation, loss of biodiversity, and waste management ...

The sustainable energy transition is a transformative shift towards renewable energy sources, aiming to move away from fossil fuels and towards a system centered on renewable energy. ...

In a scenario where the world achieves the targets set at COP28 of tripling renewable energy capacity and doubling energy efficiency by 2030, the global share of renewable energy would ...

It also covers the stress this places on traditional power grids and the need for cleaner, more resilient energy sources like solar and wind. The article emphasizes the role of policy and ...

The International Energy Agency (IEA) projects that achieving a 50% reduction in emissions by 2050 will require a comprehensive energy transition, in which renewable energy will play a ...

To address pressing challenges such as climate change, environmental degradation and energy security, the global transition to renewable energy has become essential. This study presented ...

Tidal energy is quickly emerging as a viable solution in the quest for sustainable and renewable energy sources. As the world grapples with the adverse effects of climate change, the potential ...

The evidence is clear: when climate commitments are paired with a coordinated policy approach, clean energy expansion is transformative. We make the case for policymakers to set ambitious ...

New York, July 2 - A new study published today shows that coupling renewable energy targets with supportive development policies and investments would have major financial benefits. ...
