

Google sunroof project Brazil

What is Project Sunroof?

Project Sunroof puts Google's expansive data in mapping and computing resources to use for people and organizations interested in solar power, helping illustrate the potential of solar power for a single house, and with the introduction of the data explorer, the potential of solar for zip codes, cities, counties and states.

Does Project Sunroof have solar data?

We currently have solar data for portions of 50 states and Washington DC. See if we've got you covered. Project Sunroof is a solar calculator from Google that helps you map your roof's solar savings potential. Learn more, get an estimate and connect with providers.

What are Google Maps and Google Project Sunroof?

Google Maps and Google Project Sunroof are used in a tool developed by MyHEAT to quickly calculate a roof's estimated solar potential and recommended panel size. Saskatoon is one of the best places in Canada for solar power.

Where can I purchase Project Sunroof panels?

Project Sunroof provides information on the savings you can expect from the panels, whether you lease or buy them outright. Currently, the service is available in three locations in the US: Boston, San Francisco, and Fresno. If it's successful, Google plans to roll it out across the rest of the States and potentially overseas.

What is sunroof & how does it work?

Initially launched to drive consumer awareness and education, the service now also makes it easy for interested homeowners to connect with solar providers in their area. Sunroof covers 43 million rooftops in the U.S. -- which is more than 50% of all households -- and in the coming months will be available in all 50 states.

Google has always been a proponent of clean energy, and solar power has been a central part of our vision. Over the past year, Project Sunroof has been helping homeowners explore whether they should go solar - offering solar estimates for over 43 million houses across 42 states. Solar installations today are growing rapidly, but there remains ...
