How many MW of new battery storage capacity does Greece have?

The Greek energy regulator has awarded 300 MW of new battery storage capacity in the nation's second energy storage tender, split among 11 projects. The tender is part of the country's 1 GW energy storage auction program. The projects range in size from 8,875 MW/17,75 MWh to 49,9 MW/100 MWh).

Can a battery storage plant be built in Greece?

An increasing number of local and foreign companies are interested in building energy storage facilities in sun-loving Greece using battery technology. In fact, the Regulatory Authority for Energy (RAE) has been receiving applications for permits concerning battery storage plants.

Why is Greece launching a battery storage auction?

Initially a response to the COVID 19 pandemic, the focus has pivoted to support Greece's green energy transition. The storage auctions themselves require further approval under EU State aid rules. The pipeline of prospective battery storage projects now approaches 27GW, with over 500 projects granted a storage license.

Does Greece need a third energy storage tender?

Greece's first energy storage tender took place last year. It awarded 12 energy storage projects, or 411,79 MW of capacity, with an average price of EUR49,748/MW per year. To conclude its energy storage auction program, Greece needs to run a third storage tender to account for the remainder of the program's 1 GW of capacity.

What is the Greek energy storage tender?

The tender is part of the country's 1 GW energy storage auction program. The Greek energy regulator has awarded 300 MW of new battery storage capacity in the nation's second energy storage tender, split among 11 projects. The tender is part of the country's 1 GW energy storage auction program.

How much battery storage will Europe have by 2030?

However, based on current policies, the country looks set to hit only 4.8GW of operational battery storage capacity by 2030, as shown in the above infographic from LCP Delta's STOREtrack market intelligence platform covering energy storage across Europe.
