Our minimum stay is 1 week. The Solar House is an environmentally friendly solar-heated building. Fresh air is continuously taken in at roof level, micro-filtered, heated and ...

The colour coding of buildings and houses in Greenland dates back to its 18th-Century colonial era, when wooden houses were sent up from Scandinavia as timber kits. There were no house numbers or street names so all buildings were one of five base colours - red, black, yellow, green and blue - and each colour had a specific meaning.

The solar industry in Greenland has been steadily growing, with both commercial and residential sectors investing in solar products and services. The use of solar panels has been gaining popularity as a means of reducing the country's dependence ...

The technical feasibility of solar, battery, and hydrogen power for the off-grid energy supply to a Finnish house has also been evaluated ... In this work we investigate potential solar feasibility in Greenland using the village of Qaanaaq, Greenland as a case study to demonstrate several optimized energy scenarios. 1.1.
