Solar photovoltaic client case study - The El Dorado airport in Bogotá, Colombia, commissioned us to install rooftop solar panels to supply them with green, local energy. Airports El Dorado Bogota, Solar production - GY Colombia - GreenYellow

Union Airport Roland Garros has committed to begin its transition to renewable energy and aims to reduce its greenhouse gas emissions by 55% by 2030. It has chosen GreenYellow to help it achieve its environmental objectives. With 4,095 panels installed on 11 shaded areas, the equivalent of 2 soccer fields, GreenYellow is leading the project for the largest self ...

The multi-site project developed by GreenYellow Thailand for King Power has a total installed capacity of 6.85 MWp and covers 8 of the group's buildings. Thanks to this network of multi-site solar installations, up to 9.9 GWh of clean energy will be generated every year. This is equivalent to the annual energy consumption of over 5,500 households in Thailand.

Since 2007, the GreenYellow method has proven its effectiveness by combining a global approach to energy with solutions tailor-made to meet the specific challenges of each client. Our decarbonization platform integrates our turnkey offers #SHIFTProduction for decentralized solar power generation, #SHIFTEfficiency for energy efficiency, #SHIFTStorage for energy storage ...

The Power Purchase Agreement (PPA) is a contract model including financing that allows you to benefit from a solar photovoltaic power plant without having to bear the high initial investment costs. GreenYellow will design, finance, install and operate the solar plant on your site. There are two possible scenarios:

GreenYellow and Nestlé accelerate sustainable development with Thailand's largest solar project, aiming to reduce CO2 emissions by over 2,000 tonnes per year. GreenYellow, a leader in decentralized energy transition, is proud to announce the inauguration ceremony of a solar power purchase agreement (PPA) with Nestlé (Thai) Ltd. The partnership will see the installation of ...
