Where does Grenada get its energy from?

Grenada derives almost all of its energy from imported hydrocarbons. In 2020, non-renewables accounted for roughly 98% of installed capacity and electricity generation, with solar energy making up the difference.

Who are Vitaro energy's clients?

Our clients include national oil companies, multinationals, leading industrial companies and utilities. Vitaro Energy offers a range of high-grade bitumen and diesel products to customers across the construction industry in Romania and neighbouring countries.

How much electricity does Grenada use?

In 2020, Grenada produced 223 GWh of electricity, relying mainly on fossil fuels (98.12%), with a small contribution from solar energy (1.88%). In 2018, peak demand was 33.2 MW. In 2016, Grenada consumed 185.1 million kWh of electricity. As of 2018, 95.3% of the population had access to electricity.

Does Grenada have a wind farm?

Grenada has had success with implementing energy efficiency and renewable energy projects. To date, GRENLEC has assessed five sites on the main island and two on Carriacou for wind farm feasibility. A wind-diesel hybrid has been discussed for Petite Martinique, but its development is on hold.

Who is responsible for energy projects in Grenada?

The MOID (Ministry of Infrastructure Development, Public Utilities, Energy, Transport, and Implementation) is responsible for energy programs in Grenada. MOID handles the majority of permitting related to energy projects.
