

WEG has announced the signing of contracts with Alupar for the supply of a transmission grid stabilization system for Chile. The scope includes a solution with synchronous condensers, ...

The scope includes a solution with synchronous condensers, step-up transformers, and complete control and protection systems, startup and synchronization with the electrical grid, as well as ...

Traditional power grids rely on large, spinning generators fueled by fossil fuels or nuclear energy, which provide inertia--a physical property that stabilizes the grid by resisting sudden changes ...

Since the last Article IV of June 2022, economic growth has been resilient and the authorities have made significant progress in infrastructure development. The economic outlook for 2025 ...

Key issues to address include grid stability, voltage control, short circuit power, and frequency control. A more flexible approach to the grid is needed, utilizing a combination of technologies such as flywheels, battery energy storage ...

Funded by the World Bank, the African Development Bank, and the French Development Agency, the project will add 15 megawatts of solar energy to the national grid. The project is expected ...
