How much does energy cost in Guadeloupe?

Energy Snapshot Guadeloupe This profile provides a snapshot of the energy landscape of Guadeloupe, an overseas region of France located in the eastern Caribbean Sea. Guadeloupe's utility rates are approximately \$0.18 U.S. dollars (USD) per kilowatt-hour (kWh), below the Caribbean regional average of \$0.33 USD/kWh.

Where can I find information about Guadeloupe energy?

Welcome to the website of Guadeloupe Energie! On this website, you'll find information on Guadeloupe's progress on energy transition from energy legislation to industry data, from profiles for renewable energy in Guadeloupe to the latest news and events--all in one place.

How can Guadeloupe achieve energy independence?

"Achieving energy independence in Guadeloupe by shifting from fossil fuels to renewable energy sources is a challenge that we must take up for the benefit of future generations. With clear objectives and applying the means for success, the Multi-Year Energy Program (PPE) exemplifies our political resolve to reach our goals."

Is Guadeloupe a renewable country?

Guadeloupe has a large portfolio of renewable generating capacity, with 112.8 MW installed as of 2013. It also has a diverse portfolio, both in terms of generation types and facility ownership.

Does Guadeloupe rely on imported fuels?

Nevertheless, Guadeloupe's reliance on imported fossil fuels--more than half of the island's electricity is generated from imported petroleum-based fuels--leaves it vulnerable to significant disruptions in shipping or the availability of import facilities.

The development of biomass energy addresses several strategic challenges for Guadeloupe: Promote expansion of all types of renewable energy currently available in Guadeloupe to achieve the PPE objective of energy [...] [Read more. Biomass Resources](#)

Guadeloupe U.S. Department of Energy Energy Snapshot Installed Capacity 556 MW RE Installed Capacity Share 22% Peak Demand (2018) 247 MW Total Generation (2018) 1,704 GWh Transmission and Distribution Losses 13.9% Electricity Access 99% Average Electricity Rates (USD/kWh) Commercial \$0.19 Electricity Sector Overview 82 MW (by 66 MW)

Guadeloupe has significant wind energy resources that has strong potential for development. The Regional Wind Energy Plan (Schéma Régional Eolien) estimates potential of an additional 70 MW to 110 MW. And yet, if repowering 1 projects are excluded, the sector has barely grown since 2010. This situation changed in 2019 with the installation of ...

Guadeloupe modern energy

For this reason, energy for final consumption must either be generated locally or transformed from imported primary energy. Guadeloupe's energy dependence rate (defined as net energy imports divided by primary energy consumption, and expressed as a percentage) grew by 7 percentage points to 97% from 2008 to 2010, before falling gradually to ...
