

Guam distribution energy systems

How many Customer-Sited distributed energy resource systems are there in Guam?

Over 2,000 customer-sited distributed energy resource (DER) systems represent significant assets to Guam's renewable energy (RE) generation. Nearly 22 MW of DER generation capacity accounted for 2.6% of total generation/sales and 23% of total RE generation/sales in 2021 (see Table 6).

How can Guam reduce reliance on diesel power?

In addition to increasing the resilience of its power system, Guam is also seeking to increase utilization of renewable energy sources to reduce reliance on diesel powered generation.

Why is Guam reliant on imported fuel?

With no indigenous fossil energy resources, Guam is reliant on imported fuel for their energy and transportation needs, with most of the imported fuel coming from Asia. The Guam Power Authority (GPA) is a public-power utility and autonomous agency of the government of Guam.

How much energy does Guam use?

Conclusion Total energy consumption in Guam has been increasing over the past 12 years. In 2021, the island consumed 241 million gallons of imported fossil fuels. Of the total energy consumed on the island, less than 4% is supplied by carbon-free renewable energy.

What data is available on Guam's energy sector?

Introduction This report summarizes the currently available data on Guam's energy sector as of December 2023. It describes primary energy consumption, end uses, energy production, relevant policies, and key challenges, including details on the electric power and transportation sectors.

What is Guam's energy policy?

In 2019, P.L. 35-46 raised the RPS to 50% net electricity sales by December 31, 2035, and 100% by 2045. Regulations are described in Guam Code § 8311. GPA's Clean Energy Plan (2022 Integrated Resource Plan) roadmaps a path to 100% clean, reliable, resilient, affordable energy by 2045 and builds upon the 2008 IRP.

The study will collect data from 500 participants on energy consumption, energy technologies, energy burden, and interest in renewable energy solutions. The focus groups, to be held prior to the survey administration, will consist of 6-10 participants per session, ensuring diverse demographic representation across Guam.

Japanese invasion, and further installations after Guam's liberation, during and after the war. The constructed distribution systems were turned over to the Government of Guam to operate for the civilian population. GWA operates and maintains over 200 water facilities on the island in addition to over 380 miles of distribution system lines.

Governor & Lt. Governor launch New Energy Initiative The Governor and Lieutenant Governor are concerned about the rising cost of fuel, and are doing something about it. Today they launched their New Energy Initiative. "We've relied on fossil fuels on Guam for more than a century," Governor Eddie Baza Calvo said. "We can't rely

distribution system. 8.
