Can offshore Guinea-Bissau reshape the energy sector?

Offshore Guinea-Bissau is due to see some potentially transformative exploration drilling in the new future, and this drilling can have a great role in reshaping the energy sector in the West African country.

How sustainable is the electricity sector in Guinea Bissau?

The electricity sector in Guinea Bissau is in the midst of a transformational reform towards a sustainable development characterized by reliable, greener and affordable service delivery.

Does Guinea-Bissau have electricity?

Guinea-Bissau has one of the lowest electrification rates in Sub-Saharan Africa with only 29 percent² of the population - around 53 percent in urban areas - having access to electricity (Figure 1).

How much money is needed to achieve universal electricity access in Guinea Bissau?

8. Around US\$263 million of public and private funding will be needed to achieve universal electricity access in Guinea Bissau by 2030. To achieve this goal, a combination of grid (70%) and off-grid (30%) solutions will be required to bring 400,000 additional new connections¹⁸.

Is biomass a source of electricity in Guinea-Bissau?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Guinea-Bissau: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

How will the ECOWAS regional Access Project Impact Guinea-Bissau?

The ECOWAS regional access project will extend and strengthen the distribution network in Guinea-Bissau from the planned four high-voltage substations, and supply electricity to 198,000 additional people (33,000 households) by 2022. A low-hanging fruit opportunity to bring electricity to additional 31,443 households exists.¹⁷ 8.

Guinea-Bissau's energy and transport infrastructure are at the core of the recently published Country Strategy Paper 2022-2026. Energy Situation and Priorities 1. Guinea-Bissau has a dual energy economy based on domestic wood-fuels and imported oil. About 90% of total energy consumption is accounted for by firewood and charcoal, which are used in almost all households for cooking as well as in traditional rural, commercial and artisanal activities.

Energy use in Guinea-Bissau is roughly 0.3 toe per person per year, and is one of the world's lowest. The biomass represents over 95% of the total energy consumed by households in Guinea Bissau. Wood is the dominant fuel with a demand that exceeds 500,000 tons per year, followed by charcoal being the most-used fuel in the capital.

Our team's 400+ years of combined expertise in energy, infrastructure and aerospace has enabled ARECOR to set new standards in emissions-free baseload energy generation. Committed to reliability, affordability and sustainability, ARECOR is meeting today's energy demand while driving a cleaner energy future for tomorrow.
