The RC in Guinea is leading a collaborative effort to expand energy access, particularly in rural areas. By supporting the construction of hydroelectric dams and solar power plants, promoting renewable energy, and engaging with young people, the UN is helping to empower communities and accelerate progress towards the SDGs.

OverviewConsumption and accessBiomassElectricityOilRenewable energySee alsoExternal links Three primary energy sources make up the energy mix in Guinea: fossil biomass, oil and hydropower. Biomass (firewood and charcoal) makes the largest contribution in primary energy consumption. It is locally produced, while Guinea imports all the petroleum products it needs. The potential for hydroelectric power generation is high, but largely untapped. Electricity is not available to a high percentage of Guineans, especially in rural areas, and service is intermittent, even in the capita...
