Does Guyana have a loan guarantee?

GEORGETOWN, Nov 28 (Reuters) - Guyana has received preliminary approval from the U.S. Export-Import Bank for a more than \$500 million loan guarantee to support a natural-gas fired power project and gas processing facility, a government official said on Thursday. Construction of the about \$2 billion gas-to-energy project is underway.

How will a gas to power project impact Guyana?

The gas to power project will have significant transformational benefits for Guyana: The gas to power project is expected to support diversification and a competitive economy. Investment in gas to power generation to lower electricity prices could foster development in new industries and sectors.

Is liquefied natural gas (LNG) a viable solution for Guyana?

Phase 2 associated gas is planned to be utilized for liquefied natural gas (LNG) production, depending on the capacity. According to the Gas Master Plan Update (2021), the Gas to Power solution is economically viable for Guyana, with the recommendations for a phased development (see Figure 1 below).

Which recommendations are applicable for Guyana's gas to power project?

The following recommendations are therefore applicable for Guyana's gas to power project. Adequate grid infrastructure, policy, and legislative changes are required to ensure that all Guyanese benefit entirely from the gas to power project.

Could a gas-to-power project improve Guyana's Electricity Reliability?

Guyana's plan to improve the reliability of its electricity and lower the cost of electricity through a gas-to-power project could be a critical pillar that ensures that the benefits of natural resource exploitation are broad-based this time around. The gas-to-power project has two phases:

What is the future of energy in Guyana?

The development of alternative renewable energies, such as solar, wind, hydropower, and biomass technologies, remains a key priority for the future growth of the energy sector in Guyana. Government of Guyana has committed to reducing the cost of electricity by at least 50% over the next five years (Budget 2022).
