Solar is a natural choice for Aruba where the sun shines 365 days a year. Managing Director Lennert van der Poel, explains that Botica Di Servicio is taking a leadership role in the switch to alternative fuels on Aruba, noting that solar power saves money in the long run, and is a reliable source of energy, besides helping slow down global ...

The solar park at Aruba Airport is completed. Different local and international companies have worked together to complete Caribbean's largest solar park. More than 14.000 solar panels are installed and cover the entire parking lot at the airport. The solar panels produce 3, 5 megawatt, enough to provide 500 households with green energy.

Streamlining the solar energy approval process is the first and most crucial step. Encouraging more businesses and homeowners to invest in solar will help Aruba reach its renewable energy goals and attract eco-conscious tourists. Aruba has the potential to be a leader in green energy and sustainable tourism, but decisive action is required today.

Solar Panel Tilt Angle in Aruba. So far based on Solar PV Analysis of 2 locations in Aruba, we've discovered that the ideal angle to tilt solar PV panels in Aruba varies between 12°; from the horizontal plane facing South in Noord and 11°; from the horizontal plane facing South in Oranjestad.. These tilt angles are optimised for maximum annual PV output at each location ...

Home solar Aruba

Solar: Sustainable Energy In Your Home. Solar energy refers to the utilization of sunlight to generate electricity or heat. Solar power systems typically consist of photovoltaic (PV) panels, which convert sunlight into electricity, and solar thermal systems, which capture sunlight to generate heat for water heating or space heating.

Savaneta, Aruba, located at 12.4505° N, -69.9307° W, offers an excellent year-round location for generating energy via solar photovoltaic (PV) systems. Situated in the tropics, this Caribbean destination benefits from consistent sunlight throughout most of the year, with seasons characterized more by wet and dry periods rather than traditional temperature-based seasons.
