

Home solar energy New Zealand

How can solar power help New Zealand?

We're working with the sector on New Zealand's renewable energy and low-emissions transition. We're responsible for the governance and regulation of New Zealand's electricity industry. Solar power can help you become more self-sufficient, reduce your carbon footprint and reduce your energy costs.

Are solar panels a good investment in New Zealand?

Solar panel installation can be a worthwhile investment for homeowners and businesses in New Zealand. With the rising cost of electricity and growing concerns about the environment, solar energy offers a sustainable and cost-effective alternative.

Should you install solar panels in New Zealand?

There are numerous benefits to installing solar panels in New Zealand. One of the main advantages is the potential for significant cost savings on your energy bills. By generating your own electricity, you can reduce or even eliminate your monthly electricity costs.

Is going solar a good idea in New Zealand?

Going solar helps the environment - it creates clean, green energy and is a great way to reduce your carbon footprint. Going solar demonstrates your commitment to sustainability and will help New Zealand achieve its target of net zero greenhouse gas emissions by 2050. Is your property suitable for solar?

Should I buy a solar power system?

Solar is about using the power of the sun to power your home - you can also sell the electricity you generate back to the grid. If you answer yes to most of these questions and you own the house, then a solar power system could be a good option. Solar generates energy during daylight hours. Is someone at home to use it?

Is solar power the future of energy?

Solar power is the clear answer for the future of energy as it localises energy generation at the point of consumption and passes the power to choose back to the individual home owner. Although many large entities are not yet committed to solar power, a household can proactively choose to benefit from having a solar power system on its roof.

Solagri's mission is to have a positive, disruptive influence on New Zealand's rural electricity market, giving farmers more control over their electricity costs. The grid energy, combined with the lower cost solar energy generated on farm, ensures the price rural energy users pay for electricity remains competitive.

Forward Solar is established in 2018 and aims to provide world-class and cost-effective solar energy devices to New Zealand's clients. Supported by JA Solar, recently listed on the World Top 500 Energy Companies, we are the major DISTRIBUTOR in New Zealand and adjacent pacific islands, offering high-performance
