

# Human powered flywheel generator

Usability evaluation is crucial in human-centered design but can be costly, requiring expert time and user compensation. In this work, we developed a method for synthetic heuristic evaluation ...

Human-powered vehicles (HPVs) offer a fascinating and eco-friendly way to travel in a world increasingly aware of environmental issues and personal health. Unlike their motorized counterparts, HPVs rely solely on ...

Millions of people around the world are running, cycling and rowing on machines that devour electricity. Now, eco-savvy gyms are harnessing the energy their exertions generate to power the equipment, a change made ...

Why spend hours recording videos when AI can do it for you? AI avatar generators let you create lifelike digital presenters without needing actors or a studio. Whether for marketing, training, or social media, these tools make ...
