I was thinking of a 24V system however, it seems all the energy... companies are pushing the 48V system and it does seem to be the direction things are going and the pricing seemed great. The above system seems good enough to power my 24" bus for one or two people living fulltime. I did want to keep the bus power and solar systems separate.

If there are no requirements for charging speed during driving and parking, you can choose the 12V system. The 48V system is relatively mature, and the parking charging speed is faster than the 12V system. If you do not pursue the driving charging speed but only the parking charging speed, the 48V system is the first choice.
