

Hungary stratagem energy

What is Hungary's energy strategy by 2030?

By 2030, Hungary aims to reach approximately 20% renewable energy share in primary energy demand according to its Energy Strategy. This is an indicative rather than binding target. For more information about this policy, visit the IEA Policies Database to learn more about Hungary's 2030 Energy Strategy.

What is Hungary's Energy Strategy for 2040?

Hungary's Energy Strategy for the year 2040 focuses on clean, smart, and inexpensive energy while increasing energy independence and security and decarbonizing energy production. The strategy was incorporated into the amended National Energy Strategy for 2030.

What is Hungary's electromobility strategy?

The Strategy also covers the integration of electric vehicles into the electricity grid (smart charging, "vehicle-to-grid" technologies). In 2015, Hungary was one of the first EU member states to create its national electromobility strategy, the Jedlik Ányos Plan.

Will Hungary build a new nuclear power plant?

Hungary is planning to construct a new nuclear power plant. Although renewable energy generation has expanded significantly, the sector's growth has been slowed down recently due to the lack of sufficient grid connection points.

What is the Hungarian battery value chain strategy?

Based on the situation analysis presented above, the vision of the Strategy, which takes the form of a long-term concept, is to support the establishment of a Hungarian battery value chain based on high value-added services and production in Hungary, as well as a joint value creation by international and national operators.

What percentage of Hungary's energy is renewable?

According to preliminary estimates from the Hungarian Energy and Public Utility Regulatory Authority (MEKH), renewables contributed for 19.2 percent of Hungary's energy generation in 2021. Among renewable sources, solar generated the most with 3,793 GWh, a 54.3% increase since 2020.

Hungary plans to cut greenhouse emissions by 50 percent compared with 1990 levels, up from the current 40 percent. Energy consumption will have to come to no higher than 740PJ, down from the original target of 785 PJ, it said. The plan also raised the ratio of sustainable energy resources to 30 percent by 2030, from the current 21 percent.
