

How much does a solar battery cost in the UK?

Solar battery prices in the UK range from £3,500 to £10,000, yet they offer a dependable power source during dark winter nights by storing excess energy from the daylight hours. Our comprehensive guide ensures you have the necessary insight on solar battery prices, grants, and savings opportunities to make an informed decision confidently.

How much does a solar system cost in the UK?

When factoring in solar panel costs in the UK, the average 4kW solar system with battery price, for a 3-bedroom house, could reach £13,000 to £15,500. On the other hand, pairing a 5kW solar system with a battery can cost around £16,500 - £18,500. As you can see, the prices increase the larger your solar system size is.

Are hybrid solar panels worth the cost?

The above estimates do not include the cost of a solar battery. Generally speaking, hybrid solar panels are double the price of regular solar panels. This is based on the fact that it's still a relatively niche product, and there is still a lot of variability in costs, dependent on the model you're using.

How much does it cost to install a solar battery?

The price of installing a solar battery falls by around £2,000-£3,000 if it's installed at the same time as solar panels. The price of the inverter is already folded into the total amount of a solar panel system installation, and adding a battery doesn't involve much additional labour cost either.

What is a hybrid solar panel?

A hybrid solar panel is a combination panel that can produce electricity and heat at the same time. They're also known as solar PV-T, or solar photovoltaic-thermal panels, meaning they take both energy and heat from the sun. What that means for us, is that we can use one panel to generate electricity as well as heat and hot water.

Do hybrid solar panels reduce energy bills?

Having said that, based on the premise that solar panels are estimated to reduce your energy bills by 70%, and bearing in mind that solar PV-T panels are believed to be up to four times more effective, as outlined above, that saving should only increase. The hybrid solar panels increased efficiency means you should also need fewer panels.
