This is BorgWarner's first integrated electric drive module (iDM) business in China, and it is currently installed in Li Auto's L8 and L9 range-extended electric vehicles (REEV). It is ...

A heat pump is a climate-friendly option for heating - and even cooling. It uses the available environmental energy from the earth, air or water and converts it into heat or coolness. In combination with a photovoltaic system, the heat pump is even completely emission-free and CO₂-neutral.. Reduce your heating costs and opt for a modern, space-saving heat pump from ...

The modular system solution can satisfy various OEM requirements, both hybrid and pure electric; Shanghai, China, October 29, 2019 - BorgWarner announces a partnership with one of China's leading New Energy Vehicle (NEV) brands to supply the fully integrated drive module (iDM) for their pure electric vehicle. This partnership represents ...

China has great opportunities of lowering the environmental footprint of its district energy system. While the country has pursued assertive public policy decisions in recent years, it is essential to elevate cleaner, energy-efficient district energy as a priority for action so that policy development and implementation can be achieved quickly.

iDM220 integrated drive module to a leading Chinese luxury New Energy Vehicle (NEV) brand. After the recent award of an iDM for a Korean customer, this is now the first business in China, continuing our success with the BW iDM technology. The ...
