

Ingrid energy Malta

Why is Malta connected to the European power grid?

Since 2015, the Malta-Sicily interconnector allows Malta to be connected to the European power grid and import a significant share of its electricity. At 4.9%, Malta had the lowest share of renewables as part of gross inland energy consumption in the EU in 2017.

What is energy in Malta?

Energy in Malta describes energy production, consumption and import in Malta. Malta has no domestic resource of fossil fuels and no gas distribution network, and relies overwhelmingly on imports of fossil fuels and electricity to cover its energy needs.

How many electricity plants are there in Malta?

Malta has four electricity plants operational and the total combined nominal installed capacity is 537.8 MW. The Malta-Sicily Interconnector, which has been in operation since April 2015, allows for an electricity link between the Maltese Islands and the Italian electricity market has bidirectional flow capacity of 200 MW.

Can you get a grant for solar water heaters in Malta?

Grants for rooftop solar water heaters, which are popular in Malta, as well as solar feed-in tariffs are also available to help people consider the installation of solar panels.

How does Malta use organic waste to generate electricity?

As part of organic waste treatment, Malta's waste management company Wasteserv uses the country's organic waste in an anaerobic digester plant to generate biogas for electricity production. So far this has reached a capacity of 2.58 GWh of electricity in 2021

Does Malta use natural gas?

Natural gas has only been used for generation on Malta since CCGT systems were installed at Delimara Power Station in 2015, before which oil was the main fuel used. Oil has been the primary fuel for electricity generation for many decades before 2015, although Malta also possessed coal generation capacity from 1980 until 1996.
