

Downloadable (with restrictions)! This paper contributes to the small but growing literature on the linkages between renewable energy consumption, international trade, oil price and economic growth. It aims to investigate such dynamic relationships using the bounds testing approach to cointegration and the ARDL methodology for Tunisia over the period 1980-2011.

3. Tunisia: a favorable context to renewable energy promotion 3.1. Energy dependence Because of the stagnation of the national energy supply and the increase of energy demand, we assist to an increasing dependence on foreign energy. Until the mid-80"s, Tunisia had benefited from a favorable energy situation.
