product output. Solar Products Manufacturers and ...

Solar panels may do the legwork of generating electricity from sunlight, but the inverter is the part of your solar system that enables you to use that power. Inverters convert the DC (direct current) electricity from the PV panels to AC (alternating current) power - which is what's used in the power grid, our workplaces and our homes.

With energy prices soaring, there's never been a better time to join the solar revolution. And with Island Solar, you can be sure that your solar power system will always be working at maximum efficiency. Island Solar's proven solar design and installation process analyses your power requirements and creates a custom system ideal for your home.
