How many Bess facilities does smgp have?

Since the first commissioned grid-scale 10 MW BESS facility in Masinloc in 2016, SMGP has completed and commenced the commercial operations of 21 BESS facilities located nationwide. In 2022, SMGP has completed a total of 390MWh BESS capacity and is in the process of completing the additional 580MWh this year.

How is Bess transforming the Philippine energy industry?

With the commercial operations of approximately 1,000 MW of BESS facilities across 32 locations in the Philippines, we are now ushering in a new era for the Philippine energy industry through significant improvements in grid reliability and the integration of more renewable power sources to the country's diverse energy mix.

Could a Bess facility help stabilize a grid?

BESS facilities are seen as a solution to help stabilize a grid and prevent rotating brownouts like what happened earlier this week, as they can store energy produced by a power plant.

What is Bess & how does it work?

The company said its BESS projects would allow the safe integration of renewable energy to the national grid. BESS can be used to bridge the energy security gap by storing excess energy when it is available, and releasing it when demand is high.

How many Bess projects is SMC completing?

SMC earlier said that its BESS projects are part of its Php124 billion capital expenditure for the year. It also announced in April that it is completing 31 BESS projects nationwide. Power Philippines is an independent online news publication that aims to provide the latest stories on the energy sector.

How can smgp bridge the energy security gap?

BESS can be used to bridge the energy security gap by storing excess energy when it is available, and releasing it when demand is high. "When completed, SMGP expects the BESS business to contribute meaningfully to its revenues," the company said.

The Philippines is all set to become one of the world's leaders in the Battery Energy Storage System (BESS).
