I've written an open source program that lets you read and write parameters for BMS from the JKong company, often referred to as jkbms or jk-bms. You can find it on Github here There is ...

An RS485 / Ip gateway can also be used. Simply set it up in the module configuration. Up to 15 bms can be read / write via a single port. You can modify the various parameters, but this is ...

?????????? JK BMS,????????? BMS ?????????? PI4 ?,?? PSM,????????????????????? ?????????? Windows ???,????? ...

I use it to connect to multiple (around 5) BMS units, and it works very well. However, I'm concerned that there might be too many write commands being sent to the BMS. Why do I see ...
