

Focusing on the latest development of microgrid operation control technology, this paper combs and summarizes the related research at home and abroad, including the key technologies of ...

Jordan solar project: Ambitious 200 MW Solar PV Initiative for Sustainable Energy Jordan has issued a tender for a 200 MW solar PV project, inviting proposals to significantly boost its ...

PG& E buys San Jose building to bolster South Bay operations Africa: African Development Bank's SEFA Supports Electric Cooking Expansion Across Three African Nations Watch a ...

We're sharing a 2-minute video on our pioneering work to make microgrids more efficient, reliable and secure. The TIGON project will soon be coming to an end. We've got a lot of information ...

Looking out over the longer term, Renewvia has much more ambitious solar-storage microgrid development plans. It is in the process of raising capital to finance the first phase of its Africa Microgrid Initiative, which ...

As a result, stability analysis and enhancement have become critical aspects of microgrid development, especially as DERs play a growing role in the transition toward sustainable and ...

The evolution of throttle body technology in microgrid operations has been a critical aspect of power system control and management. Initially developed for automotive applications, throttle ...

The microgrid offers benefits across technical, economic, environmental, and social dimensions for local energy management. However, their development faces several challenges, requiring ...

Green hydrogen, produced via renewable-powered electrolysis, offers a promising path toward deep decarbonisation in energy systems. This study investigates the major technological, infrastructural, and economic challenges facing green ...

The WiMCO Tech Summit was created to foster a strong, supportive community within the mission critical industry -- especially for women, though open and welcoming to all (that means you guys). This summit is more than ...

The development of dimethyl ether (DME) technology for advanced microgrid design is in an early growth stage, with increasing market potential as the demand for clean energy solutions rises. ...

The Resilient Minneapolis Project (RMP) is a collaborative effort between the City of Minneapolis and local utilities to enhance service in low-income communities by implementing microgrid ...
