

Large residential solar systems

Congress and President Trump just passed legislation to cut the 30% residential solar tax credit in 2026--nearly a decade ahead of schedule. For homeowners considering solar, act now to lock ...

Time is running out. The federal solar tax credit--worth an average of \$9,000 in savings--expires completely for systems installed after 2025. With typical solar installations taking two to three months and high demand ...

President Donald Trump's "Big Beautiful Bill" takes aim at renewables broadly, including phasing out tax credits enjoyed by utility-scale solar and wind. But cutting the residential solar credit ...

Whole home backup is possible, but it takes a large solar system with around 30 kWh of battery storage. Let's run through an example scenario of powering essential systems during a 24-hour power outage to get an idea of ...

In this article, we'll explore some of the best home battery storage products on the market today and what to look for in a battery storage system. To find a solution that best meets your needs, consult a solar Energy ...

Looking to save on solar panel installation in 2025? Australian solar rebates are designed to significantly reduce the upfront costs of solar systems for homeowners and businesses. By taking advantage of both federal and state ...

SmartFlower Solar produces unique, ground-mounted solar panel systems that include a sun tracker and a number of other high-tech features. This "smart" solar panel system is an all-in-one, self-sustaining system that differs ...

What is a solar battery? Solar batteries are designed to work with solar panel systems. It's a device that stores the electricity you generate (but don't use immediately) from your solar panels, allowing you to then use that ...

Choosing the best solar panel can feel overwhelming, but it's easier than you think. A quality solar installer will typically install quality solar panels, so your main focus should be choosing the best solar installer for the job--your ...

Average installed solar battery prices - May 2025 The table below displays average, indicative battery installation prices from a range of installers around Australia, most of whom are active in the Solar Choice network. Prices ...

Large residential solar systems

A grid-connected PV system is connected to the local utility grid. The exchange of electricity units between the system and the grid occurs through the net metering process. Learn how this system works and how much it costs.

Mid-size residential turbines (10-100 kW) suit large properties with high electricity usage, though they require substantial towers and face more complex permitting requirements. Do residential ...

The passing of H.R.1, the big beautiful bill, brings about drastic changes to the solar tax credit landscape. Sections 25D and 48E are affected and new FEOC restrictions are in place.

The One Big Beautiful Bill Act eliminates residential solar tax credits after 2025 and introduces new timelines and restrictions for clean energy tax credits under Sections 45Y and 48E.

In this guide, we'll explain what a 10kW solar panel system is, how many household items it can generally run, and why getting a larger system could be a good idea regardless of your usage. If you're wondering how much you ...

Increasing the panel size can improve efficiency by creating a larger surface area to capture sunlight, with the most powerful solar panels now achieving power ratings of over 700W. What makes the most efficient solar ...
