**Description. ABSTRACT.** This work is on design and construction of a 1KVA mobile solar generator. Mobile solar generator converts the variable direct current (DC) output of a photovoltaic (PV) solar panel into a utility frequency alternating current (AC) that can be fed into a commercial electrical grid or used by a local, off-grid electrical network.

Solar inverters have special functions adapted for use with photovoltaic arrays, including maximum power point tracking and anti-islanding protection. (Solar Inverter, 2014) This project work involves the design and construction a 1kVA mobile solar power inverter system. 1.2 Statement of the problem
