

Liberia quanta energy

Is reliable energy the key to sustainable growth in Liberia?

The World Bank today released the fifth edition of its annual Liberia Economic Update, titled Powering Growth with Reliable, Affordable, and Sustainable Energy Access. The report offers a comprehensive analysis of recent economic developments in Liberia, underscoring the crucial role of reliable energy in fostering sustainable growth.

Does Liberia have a good energy situation?

Efforts have been made in recent years to improve Liberia's energy situation. Yet, significant challenges, including financial constraints, inadequate infrastructure, affordability issues, and an outdated energy policy, continue to hinder progress.

How can Liberia reduce its dependency on imported fuels?

To overcome these challenges, Liberia has been exploring alternative solutions to reduce its dependency on imported fuels for thermal power generation. One strategy is to diversify the energy mix by increasing the share of domestic renewable energy sources, such as solar and wind power, for electricity generation.

Can Liberia pave the way for a brighter and more electrified future?

By addressing challenges through strategic policies, investments, and partnerships, Liberia can pave the way for a brighter and more electrified future for its citizens. The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.
