

Liberia solar system rate in

How much solar radiation does Liberia have?

In Liberia, monthly solar radiation on a horizontal surface ranges from about 4 kWh/m²/day during the rainy season to 6 kWh/m²/day during the height of the dry season. This refers to the amount of solar energy that falls on a surface in Liberia each month.

How much solar energy potential does Liberia have?

Liberia has a high and consistent potential for solar energy, with an average level of 1,712 kWh/m²/year, which could generate 1,400 to 1,500 kWh/kWp. Some 43% of the land is covered with forests (41,790 square kilometers, World Bank 2015), but this does not affect the solar energy potential.

How many people in Liberia have access to electricity?

Fewer than 1% of rural Liberians have access to electricity. LIB Solar focuses on providing reliable, safe electricity to these communities by mobilizing communities instead of selling to individual customers. Each community receives high-quality solar systems that provide lighting and phone charging.

What is the primary energy consumption in Liberia?

In Liberia, more than 80% of the primary energy consumption comes from biomass. Most importantly, woody biomass is used for domestic cooking and heating. In 2004, it was estimated that over 95% of the population depends on firewood and charcoal for cooking and heating needs and palm oil for lighting. Energy consumption in Liberia is dominated by biomass.

Why is electricity important in Liberia?

Electricity is important in Liberia because it creates opportunities, such as learning, communication, starting a business, and building a better life. Unfortunately, less than 1% of rural Liberians have access to electricity. However, reliable, safe electricity is now affordable for nearly anyone. LIB Solar focuses on mobilizing communities instead of selling to individual customers to achieve economies of scale.

What is the sustainable power source in Liberia?

In Liberia, sustainable power is harnessed from tight-knit communities to provide life-changing products and services, starting with access to solar electricity. Electricity creates opportunities -- opportunities to learn, communicate, start a business, and build a better life.

A solar system has been installed at the hospital in Buchanan, the capital of Grand Bassa County in Liberia. The solar power plant was installed by the company Eco-Power as part of a partnership between the Liberian government and the United Nations Development Programme (UNDP).
