

Tesla is once again making headlines with its innovative approach to electric vehicle (EV) battery technology. The introduction of Tesla's new lithium-iron-phosphate (LFP) battery tech marks a ...

A 9-volt lithium-ion battery provides the sustained, high-drain power needed for wireless microphones and is the best 9V battery or 9V Lithium Batteries for guitar pedals, ensuring a ...

Researchers have found a new, scalable method to recycle lithium-ion batteries that tackles two major challenges: the growing volume of battery waste and global demand for critical materials used in electric vehicles and other clean energy ...

A team of Chinese researchers has made a groundbreaking breakthrough to revive aging lithium batteries by injecting a "shot" of lithium ions, potentially extending their lifespan from the typical 6-8 years or 1,000-1,500 ...

Exide Industries is strategically positioning itself for growth in energy storage by focusing on both lead-acid and lithium-ion batteries, with significant investments in innovation and ...

In a major step forward for sustainable energy technology, researchers at Worcester Polytechnic Institute (WPI), led by Professor Yan Wang, William B. Smith Professor of Mechanical and ...

This study introduces DL-SBM, a deep learning surrogate model for fast and accurate prediction of lithium-ion battery behavior. Trained on synthetic electrochemical data, DL-SBM predicts ...

Octillion Power Systems, a California-based supplier of high-density lithium-ion battery packs for electric vehicles of all types, has expanded its existing partnership with Vision Marine ...

Nextrode - Lithium ion battery electrode manufacturing Nextrode researchers are developing new tools, including pre-production design and manufacturing simulation, process diagnostics, and feedback control, to ...

Aceleron Energy Funding: \$10.6M Aceleron is using new battery technology to create the World's first recyclable, upgradeable and serviceable lithium-ion batteries to drive the global circular economy.

A 48V lithium ion battery 200Ah is a powerful, high-capacity battery designed for demanding applications like solar, electric vehicles, and industrial uses. It offers long lifespan, fast ...

Sodium is more than 500 times more abundant than lithium, which is available in a few countries. Sodium-ion battery charges faster than lithium-ion variants and have a three times higher lifecycle. However, sodium-ion ...

This should include Legislation mandating safe disposal practices for all battery types, including lithium-ion, lead-acid, and others. There is also a need for regulations requiring manufacturers ...

Panasonic unveils its new Kansas EV battery factory, boosting production with 32 GWh capacity plans. Dür and GROB factory concept compares a state-of-the-art process with a next-generation process that ...

Kalmar has introduced its second-generation lithium-ion (Li-ion) battery solution for its range of electrically powered counter balanced equipment: reachstackers, empty container handlers ...

Safety Enhancements High Energy Density Opting for lithium batteries not only ensures exceptional backup performance but also supports a more sustainable and efficient approach to energy storage and usage. By ...

The demand for lithium-ion (Li-ion) batteries is set to grow significantly across different scopes, i.e., electric vehicles (EVs), battery energy storage systems (BESS), and consumer electronics ...

Electric vehicles (EVs) are at the forefront of the automotive industry's transition towards sustainability. This article examines the lithium-ion technology now dominating the market, as ...

This initiative is part of the £2.5billion DRIVE35 programme supporting UK EV manufacturing supply chain and creating jobs in a sustainable industry. Clean tech innovator Mint Innovation ...
