

What is Lithuania's energy security policy?

At the heart of Lithuania's security policy lies a strong renewables strategy, based on bioenergy and wind energy, as part of a move to reduce electricity imports by half in the horizon to 2030 and towards zero by 2050. Today, rather than independence alone, regional integration underpins energy security.

Why should Lithuania invest in electricity storage project?

The electricity storage project will guarantee security and stability of energy supply in Lithuania.

What is Lithuania's climate plan?

The Commission's assessment finds that Lithuania's plan devotes 38% of its total allocation to measures that support the achievement of climate objectives. The plan includes reforms and investments to develop renewable energy power plants and create public and private energy storage facilities.

What is the emergency number for Lithuania?

The single pan-European emergency number 112 is operational in Lithuania, but it is not the only emergency number in use. The police handle the calls made to 112 and 02, and numbers exist for fire (01) and ambulance services (03). In addition to 112, below is a list of Lithuania phone numbers for Lithuania.

Why did Lithuania declare a state of emergency?

Lithuania declared a state of emergency Thursday, in response to the "large military forces massed in Russia and Belarus," hours after the invasion of Russia against Ukraine. Lithuania President Gitanas Nauseda announced that parliament has unanimously approved the state of emergency that will last for two weeks.

How long will Lithuania's state of emergency last?

Lithuania President Gitanas Nauseda announced that parliament has unanimously approved the state of emergency that will last for two weeks. He stated that there is a risk to Lithuania's primary security interests due to the Russian Federation's actions.
