

Vitol-owned ViGo Bioenergy has commenced biomethane injection into the grid from its latest biogas digester facility in Lithuania, marking a significant milestone in the company's strategy ...

Furthermore, liquid nitrogen cryo storage is a cost-effective option for long-term sample preservation. While the initial setup costs may be higher than other storage methods, such as ...

By 2028, Lithuania aims to establish a full-scale regulatory and investment framework enabling the expansion of energy storage capacity to 1.5 GW with a total storage volume of 4.4 GWh.

Ignitis Group, a renewables-focused integrated utility, is starting the construction of battery energy storage systems (BESS) in Lithuania. Battery energy storage parks will be installed around ...

Scheduled to be operational by the end of 2025, the facility will increase Lithuania's national storage capacity by roughly 50 percent and represents the country's first large-scale ...

The Lithuanian Ministry of Energy has increased the funding for the programme supporting the installation of large-capacity electricity storage systems for legal entities by 37.33 million ...

British renewable energy firm Aura Power has scored its first divestment in Lithuania, a 50-MW/100-MWh late-stage battery project developed through a joint venture with Balancy Grid.

The Vilnius-based energy company said construction of the sites would start this year, with commercial operations to begin in 2027. "Power generation from renewables is growing in ...

A solar park developed by European Energy in Meiluskiai, Anyksciai district, has joined the electricity balancing market organised by the Lithuanian electricity TSO Litgrid and submitted ...

Lithuania has nearly doubled its electricity generation from renewable sources between 2022 and 2024, spurred by enhanced permitting and support schemes. These policy shifts have also led ...

The Ministers of Energy and the Environment in Lithuania have approved an additional EUR37 million (US\$43 million) for an energy storage capex grant scheme, while Trina Storage has secured ...

The Ministers of Energy and the Environment in Lithuania have approved an additional EUR37 million (US\$43 million) for an energy storage capex grant scheme, while Trina Storage has secured orders in the country.
