Watch Video About Us IGEN Tech Co., Ltd., founded in 2009, a high-tech enterprise, is professional in innovative applications based on technologies of IoTs, cloud computing and big data. In 2016, IGEN Tech obtained round A financing from Sequoia Capital, and in 2022, it obtained a new round of additional strategic investment. Being focus on [...]

Sure, just go to <https://home.solarmanpv> and create an account and pair it with your inverter hardware (similar to what you probably already did with the smartphone app) Use the credentials of your just created ...

There are two algorithms for total yields. If you choose to calculate total production via total production data uploaded by devices, then  $\text{Total Yields} = \text{Total Production} * (\text{Desulfurization Feed-in Tariff} + \text{Nation FIT} + \text{Province FIT} + \text{City ...}$

SOLARMAN has developed a complete intelligent PV solution including hardware, software and data analysis to offer smart energy for global customers. SOLARMAN smart cloud platform has been a global leading PV monitoring and management platform, focuses on managing distributed PV power plants worldwide.

With the deep understanding of SOLARMAN one-stop service system for intelligent management of global new energy assets, SOLARMAN international website has been redesigned and upgraded, aiming to offer a more professional and customer-oriented service for global customers. Domain name:

Das Solarman Smart Login bietet eine intuitive und sichere Plattform zum Verwalten von Solaranlagen. Durch den direkten Zugang zur URL <https://home.solarmanpv> können Benutzer ihre Geräte schnell und einfach überwachen und steuern. Dies ist entscheidend für die Nutzung von Photovoltaiksystemen wie den Deye Wechselrichtern.

SOLARMAN Login. SOLARMAN Business; ... SOLARMAN is a brand of IGEN-Tech, as a global leading PV monitoring and management platform, SOLARMAN has developed a complete PV solution including hardware, software and data analysis to offer smart energy for global customers. ... As a clean and renewable form of energy, solar energy is becoming more and more popular. However, effectively monitoring and managing the performance of solar power systems is critical to improving energy efficiency. Solar power monitoring technology emerged as the times require, helping users achieve intelligent management of solar systems through real ...

Hi @beninho,. Potentially you could have more than one inverter at a single place. From github there's more information about the parameters required. The first two would identify YOU as a person whereas the the plant\_id would identify a specific system.

Home Energy Management Wisely managing energy use has been a high priority when households are on the way to pursue a smart life with sustainable energy, improved efficiency and reduced bills. By applying advanced technologies of IoTs (Internet of Things) and wireless communication and etc., SOLARMAN products are able to connect a variety of devices in your ...

SOLARMAN provides humanistic services for global customers. SIM card top up is one of it. Flow package is frequently used during the data transmission and data reading. Although the cumulative flow is not too much in one year, calculating the service life of a PV plant as 25 years, the flow package requires a lot. [...]

SOFAR Monitoring Portal All SOFAR inverters are equipped with several monitoring features. As standard, we supply with each inverter the WiFi Stick to connect the inverter to your existing Internet Access Point. Alternatively, Ethernet, GPRS or LTE Sticks are available to connect your inverter to the internet. SOFAR offers these monitoring portals free of charge: [...]

SOLARMAN Business is designed for installers and distributors, which is more suitable for distributed system management. With comprehensive and sophisticated functions, SOLARMAN Business will provide global leading intelligent O& M solutions for installers and distributors.

As a clean and renewable form of energy, solar energy is becoming more and more popular. However, effectively monitoring and managing the performance of solar power systems is critical to improving energy ...

The PV monitoring system is an advanced technology-based monitoring tool used to monitor and record the performance of photovoltaic power generation systems in real time. It provides accurate monitoring of key parameters such as power generation, voltage, current, temperature, etc. by collecting and analyzing data obtained from sensors on ...

Service Contact Service Hotline +86-510-68005664 (Mainland China) 09:00-18:00 (GMT+8) every day, 7 days per week, all year round Technical Support Experienced technical engineers will provide online instant Q& A and remote trouble shooting services for global customers. Email: customerservice@solarmanpv Service Field Service SOLARMAN will provide field ...
